

EXPERIENCES

"It was so easy for me to get started! I literally did everything while my 12-month-old daughter napped on me. Less than 5 minutes! Dr. Michelle was amazing when we viewed the results. I left our session feeling well-informed, hopeful, and prepared for my health journey with frequency medicine" - 26 yr old female

"I felt like I was coming down with something, and in my app playlist that week it included lots of cold, flu and infection remedy frequencies. After just a few hours of having it running, I felt back to normal and didn't end up getting sick, even though several of my coworkers did." -30 yr old female (1 hour remote session)

"I had recently been in a very traumatic accident. During my overnight session, I slept for 7 hours straight for the first time in 4 weeks. I didn't have any nightmares and I woke up feeling safe and peaceful. Also the eye problems I had been experiencing went away too. Definitely made such a difference in how I feel." -38 yr old female (overnight session)

DOCTOR ME AND YOU

Mechanics Of Voice Analysis

Monitor and rebalance
essential parameters of
your body and improve
your health today

What are Frequencies?

Fritz-Albert Popp and colleagues discovered each of our cells have a resonant frequency of emitted Electro-magnetic waves and communicate with each other via various wave lengths.

Just like sound vibrates into waves, so do our emotions and thoughts.

We ARE frequencies.

What is Frequency Medicine?

Frequency medicine is exposing damaged cells to their correct resonance frequency repeatedly for rapid healing.

Jack Swartz, Royal Rife, and Paul Nogier, pioneers of frequency medicine, found that certain frequencies correspond to various viruses, diseases, and other disorders. Dr. Nogier discovered that when a bodies' frequency of a cell is not balanced that's when disease occurs. This "short-circuit" can be remedied via frequency medicine by applying the right electrical stimuli.

Genius Insight App

The Genius Insight Quantum Biofeedback app utilizes voice spectral analysis to analyze your body and pinpoint your bodies' stressors and helps to restore human Bio-field balance.

Why the Voice?

Our voices are unique, like thumbprints, and they change based on our mind, body, and spiritual states. Consider how we analyze tone, pitch, and inflection during our conversations. This is because we inherently know that speech only occurs after a complex process involving our brains. Science has discovered that this process also includes our brain communicating with our various organs. This app utilizes this science to analyze your voice and produce remedy frequencies customized to you!
